Specialty

Constructed with specially screened IC chips and hand-tested with G.SKILL's rigorous and highly selective binning process, each Ripjaws DDR5 SO-DIMM memory kit is built for high performance and reliability. Designed to fully utilize the faster frequency speed and boost data transfer rate, each DDR5 DRAM IC is implemented with twice the amount of banks and bank groups, as well as a doubled burst length, at 32 banks across 8 banks with a burst length of 16. Combined with a module layout comprised of two 32-bit sub-channels, DDR5 memory is capable of delivering more data than DDR4.
