Specialty	<p>Auto Focus Technology: The webcam incorporates auto-focus technology, allowing it to automatically adjust and fine-tune the focus based on your distance from the camera. This ensures that you stay sharp and clear, even if you move around during a video call or if the subject of your recording changes position. Compact Dimensions: Measuring at 8311cm, the Revenger Z05 is compact and space-efficient. Its small footprint makes it easy to integrate into any workspace without being obtrusive, offering flexibility in how you set up your video environment. Superior Quality Glass Lens with Zoom: The webcam features a high-quality glass lens that not only ensures superior image quality but also provides zoom capabilities. This allows users to focus on specific details, making the webcam suitable for a variety of applications, including presentations, product demonstrations, and detailed content creation. USB Connectivity: The webcam utilizes USB connectivity, providing a reliable and stable connection for both audio and video. This ensures a seamless and uninterrupted experience during your virtual interactions, eliminating concerns about lag or disconnection.</p>
Others	<p>Camera: 140cm, DSP chip: Driverless, Auto Focus: 8x3x11cm, Zoom: Superior quality glass lens. High Resolution: The webcam is equipped with a 1080P resolution, ensuring that your video streams and images are crisp, clear, and vibrant. Whether you are participating in video conferences, live streaming, or recording content, the high resolution enhances the overall visual experience. DSP Chip with Driverless Technology: The inclusion of a Digital Signal Processing (DSP) chip sets the Revenger Z05 apart. This advanced chip eliminates the need for additional drivers, simplifying the installation process. Users can enjoy a seamless plug-and-play experience across various operating systems, making it hassle-free to set up and start using the webcam instantly. Impressive Frame Rate: With a frame rate of 30fps (frames per second), the webcam ensures smooth and fluid motion during video calls and recordings. This feature is particularly beneficial for activities such as online meetings, gaming, or streaming where a higher frame rate enhances the overall viewing experience.</p>
